Metro Atlanta – Where mobile innovation meets the real world.

Atlanta offers a world-class, collaborative ecosystem of big brands, digital media leaders, technology powerhouses, universities and a dynamic startup community that result in an unsurpassed location to drive mobile innovation on a large scale.

Its critical mass in key sub-sectors of the mobile ecosystem, such as Internet & network security, financial transaction processing, communication services, logistics software, health IT, smart grid, digital media and content, analytics and the Internet of Things are strong assets in growing wireless and mobility tech companies.

Get connected. Get involved. Make a difference.

Our goal is to build a collaborative culture across organizations that will underpin a successful mobility strategy for metro Atlanta. The Mobility Task Force and Mobility Leadership Council, backed by high-level leadership and members of Atlanta’s leading mobile companies, lead the strategic direction of the Mobile Atlanta initiative.

Our key focus areas are:

- Recruit and expand companies
- Develop the right resources to recruit and retain a skilled mobility workforce
- Create next-generation innovations by building an environment that promotes entrepreneurial efforts and R&D
- Promote our efforts to establish Atlanta as the premier mobility hub of North America

How You Can Help

- Give us a lead. Share information about a client or company you know is considering expanding or relocating in the southeastern United States or metro Atlanta.
- Join a committee. Board of Advisor members are eligible to serve on leadership committees.
- Share valuable research or market information that we can share with our prospects, such as wage rates or data on new companies locating to metro Atlanta.
- Get involved in our marketing efforts. Help us position Atlanta as a premier business location for mobility companies.
